

Google Maps in HTML

Overview

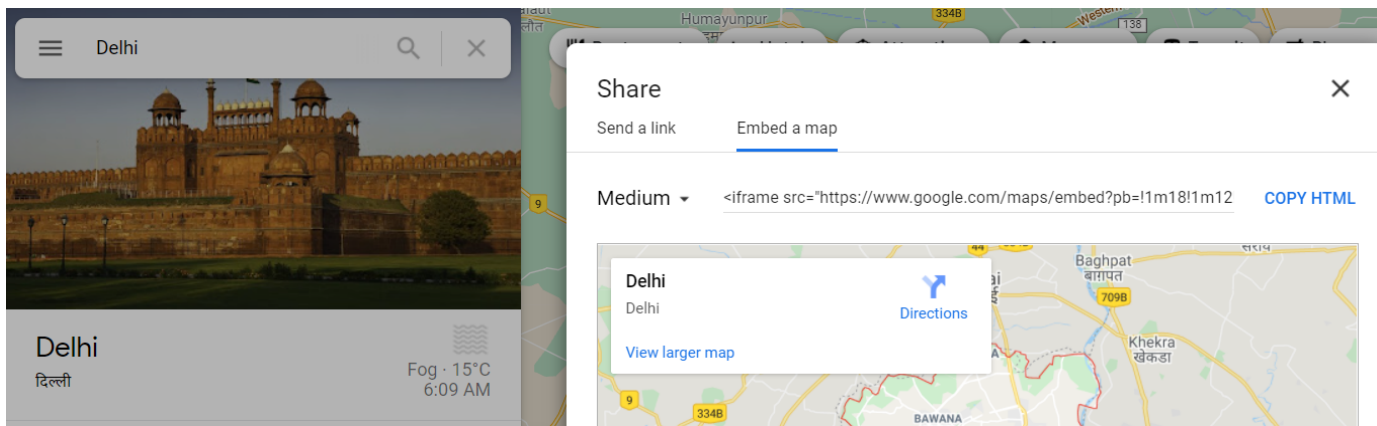

Google maps view can be added to a web page. Commonly it is used in company websites to show the location of that company office to the users on google maps.

Steps 1 : Go to google maps and enter the address you want to show

Step 2 : click on the **Share** icon.

Step 3 : Select the **Embed** tab on the Share window.

Step 4 : Click on **Copy HTML**.

Step 5 : Paste that HTML code as it is

Example : `<iframe`

```
src="https://www.google.com/maps/embed?pb=!1m18!1m12!1m3!1d223994.25250303914!2d76.95126390445984!3d28.692332876145986!2m3!1f0!2f0!3f0!3m2!1i1024!2i768!4f13.1!3m3!1m2!1s0x390d047309fff32f%3A0xfc5606ed1b5d46c3!2sDelhi!5e0!3m2!1sen!2sin!4v1636850352892!5m2!1sen!2sin" width="600" height="450" style="border:0;" allowfullscreen="" loading="lazy">
</iframe>
```

Output :
